

## ST JOSEPH COUNTY GOP TOP FIVE ISSUES AUGUST 2023

1-a) In April-May of this year, Erich Speckin, a forensic document analyst, performed a recount of paper ballots in Detroit from the 2020 presidential election. He was not allowed to touch the ballots, nor to analyze them very closely, nor was he allowed access to the machines or the digital ballot images. However, based on a simple examination of the paper ballots, he found tens of thousands of discrepancies. Many precincts had more mail in ballots than envelopes, or vice versa. Many precincts reported totals that were different than the number of paper ballots present. Some precincts had reported vote totals to the state, but their machine printout read ZERO votes cast. Of the precincts he examined, many of the mail in ballots had no corresponding mail in ballot applications (which are legally required). Both he and the Detroit staff pointed out differences in paper and ink between some of the ballots, though he was not allowed to touch or analyze the paper or ink directly (which is listed as one of his professional skills).

1-b) His 6 PAGE REPORT STRONGLY RECOMMENDS FURTHER INVESTIGATION, particularly including examination of the machine data, which he is willing to do. He does not list the Biden-Trump vote totals found in the recount. This information is not surprising, as it dovetails well with some of the findings from the famous audit of Maricopa county Arizona. It does, however, fly in the face of the claims by Democrats that this was the most secure election in history, as well as similar claims by Republicans such as Ed McBroom. This report (which can be found in full on the Gateway Pundit) was released mere days before the unrelated story of ballot fraud in Muskegon. Michael W.

### 1-c) COVER UP OF 10,000 MUSKEGON FRAUDULENT BALLOTS 3 YEARS AGO:

Muskegon City Clerk (**Ann Meisch**) notice a black female (name redacted from 1<sup>st</sup> police report now known as **Brianna Hawkins**) dropping off between 8,000 to 10,000 completed voter registration applications at the city clerk's office on October 8, 2020. Many of these registrations were found to have the same handwriting. Then suspicions were raised further when the same female hand-delivered another 2,500 applications at the last day of turning in voter registrations on October 20, 2020. Ann Meisch has been City Clerk since 2007, and she was city clerk for other Michigan cities for 17 years before that. City Clerk Ann Meisch and Deputy Clerk Kimberly Long contacted Police on October 16, 2020.

### 1-d) Observations of these Voter registrations by the City Clerk and Deputy Clerk include:

- All the voter registrations hand delivered by this "Black Female" appeared to have the same handwriting and also similar handwritten signatures.
- Some of the addresses appeared to be invalid or non-existent
- Some House numbering do not exist in Muskegon's House numbering system
- One of the addresses reported was he Muskegon High School which is not a valid address
- Some of the phone numbers appeared to also be invalid
- Some signatures did not match those on file at the voter registration databases maintain by the state
- Democrat SOS Jocelyn Benson purposely advised clerks to illegally assume and presume the signatures match.

NOTE: The word "**some**" was mentioned in initial police reports but later one's indicated "**most**" instead.

### 1- e) Observations about Mail-In Ballots include:

- All the ballots appeared to come from the same company with two locations in Southfield and Auburn Hills, Michigan
- Also the handwriting on the ballots appeared to be the same with a similar signature (probably the same as the voter registrations submitted

**1-f) City Clerk Ann Meisch and Deputy Clerk Kimberly Long contacted Police on October 16, 2020, and again on October 20, 2020.**

City Clerk told police about the Black Female (Brianna Hawkins) who told her employment entailed registering voters and helping them obtain absentee ballots. She also provided police a 42 samplings of fraudulent voter registration, and absentee ballot applications. They were identified by viewing Brianna's Facebook profile. Police Detective Logan Anderson and Captain Shawn Bride conducted a non-custodial interview with the suspect on October 20, 2020 the day she delivered another 2,500 registration forms.

In this interview with Brianna, she told police was paid \$1150/week "to find unregistered voters and provide them with a form so they can get registered to vote" or "obtain their absentee ballot".

So after the Michigan SOS and Governor were also contacted by the Muskegon Police department in the weeks following October 20, 2020 the FBI was notified. The SOS and FBI promptly buried the police report. The police Report consists of 2 separate reports. PART 1 and PART 2

**Muskegon Police Report (2020-19124) – Key Findings**

- **GBI Strategies LLC** is the organization that is running the election fraud scheme based in Tennessee. GBI Strategies started in 2014.
  - GBI Strategies, LLC is a Democrat backed organization, and was paid \$11 million dollars by a Joe Biden Super PAC in 2020 to get elected with operations in 20 different states.
  - Police Report identifies the name "Brilus" as a primary person involved.
  - GBI Strategies was paid \$1,571,386 by the Doug Jones Senate Committee back in 2018
  - GBI Strategies was paid \$188,000 by the Democratic Campaign Committee in 2018.
  - GBI Strategies owner Gary Bell manages over 70 "organizing operations" in 20 states and lends logistical and consulting support to another 7 states.
  - Bell is very strongly connected to far left wing groups such as: DSCC, DNC, Black PAC, IBEW, and SEIU to name a few
- The employees GBI Strategies were paid \$15 per hour, and \$120 per day for the Voter registration work and absentee ballot applications submissions
- A woman interviewed by police indicated that she was paid \$1150 per week and she was given a rental car, and a "reloadable cash card".
- Police reported that hundreds of pre-paid cards from different companies along with dozens of new burner phones were found in a Southfield raid most of them unopened and never used.
- Police also report noted that numerous job openings listed in Flint, MI, & in regional field sources in Washington DC & in Chicago IL, with branches all across the nation for employment for GBI Strategies.
- Police also found pelican cases in the room with semi-automatic rifles joined with suppressors and optics and customized pistols. One case had 4 rifles and 4 pistols. All were determined to be legal after notifying the ATF to inspect the weapons.

So why are we finding all of this out now on August 8, 2023? The answer is very simple – the investigation was handed over to the FBI who happily quashed it, but the real reason is that Republican Attorney General Bill Barr never wanted people know about it so he could claim that there is no solid evidence of election fraud.

Former Trump General Council Personnel Police Operations Andrew Kloster revealed that there even was an arrest at the local level, but because Barr had a standing order issued to IGNORE all election fraud matters, Kloster did not want to violate the AG standing order.

## 2. BORDER CRISIS/ HUMAN TRAFFICKING

Child sex trafficking continues to be one of the worst outcomes to the Border Crisis. Tim Ballard explained that traffickers will connect children with a “sponsor” and the authorities will release the children with no questions asked. Recently 300,000 children were placed with sponsors through the Office of Refugee Relocation. 85,000 of these children are now missing or unaccounted. What has happened to these children?

In addition, the Biden administration has made it impossible to determine if a child is related to their “sponsor” In May the US Customs and Border Protection announced it was ending familial DNA testing which in the past led DHS to detect familial fraud and rescue children.

Suspiciously the DOJ has quietly taken down a series of sections from its website related to both domestic and international child sex trafficking. Interestingly this coincides with the release of the movie “**Sound of Freedom**”

What can you do? First, stay informed and spread awareness. Do not let these children be forgotten! Second, continue to call and email your government officials from our congressman to the sheriff. Let them know the border crisis and child trafficking are important. Thirdly, support the organizations that rescue children being trafficked. Some of those organizations include

- Destiny Rescue ([destinyrescue.org](https://destinyrescue.org)) based out of Fort Wayne,
- Operation Underground Railroad ([ourrescue.org](https://ourrescue.org)) Tim Ballard’s organization
- Rescue Them ([timtebowfoundation.org](https://timtebowfoundation.org)) Tim Tebow’s organization.

Please take some time to look up these websites. Mary B.

## 3. BIG PHARMA CORUPTION

VAERS is the Vaccine Adverse Event Reporting System put in place in 1990. It is a voluntary reporting system that has been estimated to account for only 1% (read more about underreporting of VAERS) of vaccine injuries. OpenVAERS is built from the HHS data available for download at [www.vaers.hhs.gov](https://www.vaers.hhs.gov)

The OpenVAERS Project allows browsing and searching of reports with the need to compose an advanced search (more advance at [medalerts.org](https://medalerts.org) or [vaers.hhs.gov](https://vaers.hhs.gov))

### **2,512,214 Reports of Vaccine Adverse Events in VAERS**

- 35,911 COVID Vaccine Reported Deaths / 45,909 Total Deaths
- 208,190 Total COVID Vaccine Reported Hospitalizations / 294,905 Total Reported Hospitalizations
- 1,585, 094 COVID Vaccine Adverse Event Reports
- All Through August 11, 2023

**National Childhood Vaccine Injury Act (NCVIA)** of 1986 (42 U.S.C. §§ 300aa-1 to 300aa-34). This NCVIA passed in 1986 eliminates financial liability for Vaccine manufacturers from deaths or injuries caused by vaccines.

If the statement that VAERS only reports 1% of total deaths and adverse events is true, then:

- Total Report Adverse Events caused by the COVID Vaccines = 158,509,400 events
- Total Deaths caused by COVID Vaccines = 3,591,100 deaths

Realize these 2 numbers are only estimates based on 1% underreporting by VAERS  
This information came from: [www.openvaers.com](http://www.openvaers.com)

**Covid-19 Vaccine - Adverse Statistics Reported by VAERS Website Incl. US & Foreign Data as of 01-07-2022 from Dec '2020.** See: <https://vaersanalysis.info/2022/01/14/vaers-summary-for-covid-19-vaccines-through-01-07-2022/>

1. 21,745 - Deaths after COVID-19 Vaccinations
2. 37,937 - Permanently Disabled / Disabilities
3. 24,790 - Life-Threatening Events
4. 115,754 - Hospitalizations due to Vaccinations
5. 1,033,994 - Number of Adverse Reaction Events

Part of the problem with VAERS is that deaths are only attributed to the vaccines if they occur outside of a two-week window. Those that occur within that window are not logged because the CDC decided not to consider a person "vaccinated" until 14 days have passed post-injection. Then Actual Deaths are much higher.

Thomas Renz (Attorney at Law) testified 1-24-2022 at Senator Ron Johnson Senate Hearing: **Due to COVID Vaccinations**

- Rate of Miscarriages increased 300 % in 2021 over 5 year average
- Rate of Cancers increased 300 % in 2021 over 5 year average
- Rate of Neurological Disorders increased 1000 % over 5 yr avg. Went from 82,000 cases to 863,000 cases in year 2021

A Multitude of Doctors have been threatened or had their license for practicing medicine suspended or revoked if they proscribed effective medical prescriptions against COVID. Ivermectin, Hydroxychloroquine for early treatment, and nebulized budesonide for after 6 days of detection of COVID. These are the medicines doctors have prescribed that have been shown effective when in administrated in the proper dosages.

Go to [www.TimetofreeAmerica.com](http://www.TimetofreeAmerica.com) and scroll downward to find articles pertaining to effective treatments and vaccine injuries documented.

Example: Dr Meryl Nass whose license has been suspended since 2022 has sued her state's medical board in Maine. She proscribed Ivermectin to treat COVID patients and the medical board said Ivermectin was off-label, therefore she was reprimanded. She was then ordered to undergo a neurological evaluation by a board selected psychologist.

This is disclosed in an article in the Epoch Time 8-20-2023 by Zachary Steiber

#### 4. ESG, DEI, CRT, and other WOKE policy trends

YOU ARE MAKING A DIFFERENCE! If you haven't followed the story-lines of Bud Light and Target and the repercussions that result from ESG/DEI blunders, business, as they say, isn't good. Conservatives have spoken loud and clear. Millions of Americans have voted with their pocketbooks and no longer purchase these brands. The latest numbers on Bud Light have shown roughly 30% drop in revenue for last 5 months. Target revenues are 20% lower than predicted and Target stock also took a large value loss in the billions. Anheuser-Busch has fired several executives in charge of the failed Bud Light/Dylan Mulvaney trans ads. They have in recent days dropped the ESG department policy and are moving back to non political bias. Other large corporations are taking note and beginning to move away from woke politics in general. This month S&P global, one of the worlds largest credit ratings firms, has dropped it's practice of incorporating ESG into its ratings of corporate borrowers. So please continue to be vigilant. Where you spend makes a difference! If you don't like the way a business or retailer forces WOKENess upon your family, find a manager and tell them. Write a complaint on their website. Then see if they respond properly. The above examples show that we are making a difference. KEEP it up! Shop with those that don't bend to the way of leftist policy makers.

## 5. 2nd Amendment

The Biden Administration is going after legal shooting sports activities once again. Using provisions from the recently passed Bi-partisan Safer Communities Act (BSCA). The BSCA prohibits using funds from the 1965 Elementary and Secondary Education Act (ESEA) for “training in the use of a dangerous weapon.” This provision was commonly understood to ban ESEA funds from being used to train and arm teachers and other school personnel as a counter-measure to armed attacks on our schools. However, the Biden Department of Education has publicly announced that the funding restrictions now prohibits the use of funds for archery, hunting, and any other firearms related programs in schools. Think archery in Phys Ed, target and clay shooting programs and even hunters’ education.

Other Second Amendment news includes a reminder that the new laws related to universal background checks, gun storage, and “red flag” firearm confiscation are all expected to take effect in March 2024. Other news includes an NRA report on study in *Reason* magazine that reports gun ownership in the US might actually be higher than 60%; here is the link [“Far more Gun Owners”](#). Ron A.
