

# UPDATE: THE REAL REASON WHY THE LARGEST VOTER FRAUD OPERATION IN AMERICAN HISTORY WAS KEPT SECRET FROM US

Earlier this week we reported on a Michigan police raid which uncovered the **largest voter fraud operation** this country has ever seen.

That raid – which took place just one month prior to the 2020 election – found semiautomatic weapons equipped with silencers, dozens of burner phones, gift cards loaded with money, and piles of fraudulent voter registration forms.

Leading up to that raid, a multi-agency task force assembled by the state of Michigan began investigating a large batch of suspicious mail-in-ballot applications being delivered into Muskegon county by one single individual.

City Clerk Ann Meisch became skeptical when she analyzed the roughly 10,000 applications brought in by one woman, and determined that many of them had the same exact handwriting.

Then, when the woman returned with 2,500 more fraudulent applications, Meisch knew she had to call the police and did so while explaining to them that she feared something was very off with these ballots.

Police managed to track down the suspect who claimed that she was being paid \$1,150 per week to find people who were not registered to vote and to help them fill out ballot applications. She was paid on a reloadable pay card and was also provided with an Enterprise Rental car to carry out the work.

The suspect revealed that the company paying her to do this was GBI Strategies, LLC – and here's where things get crazy. GBI Strategies is a Democrat backed organization with operations in at least 20 different states. In 2020 they were paid \$11 million by a Democrat super Pac to help get Joe Biden elected.

But new discoveries suggest that the circumstances surrounding GBI Strategies are even more bizarre than they initially seemed. Despite having been handed multiple millions to make sure Joe Biden won the election, GBI Strategies HQ is someone's house!

The company's owner is Gary Bell who manages over 70 "organizing operations" in 20 states and lends logistical and consulting support to another 7 states."

That likely means that there are more than 70 companies out there like GBI Strategies, and that's just counting the ones that Bell is responsible for! Bell is also very strongly connected with several far-left groups such as the DSCC, DNC, Black PAC, IBEW and SEIU to name a few.

Needless to say it's pretty obvious who Bell and the 70-plus "operations" he runs are working for. But the major question is, why are we just now finding out about all of this nearly 3 years later? !

Well at first we believed the answer was simple – the investigation was handed off to the FBI who happily squashed it. But it turns out that the real reason it stayed buried for so long is because phony Republican AG Bill Barr never wanted people to know about it.

Former Trump administration General Counsel Personnel Police Operations Andrew Kloster revealed that he notified then-Attorney General Bill Barr about GBI Strategies but the Republican traitor chose instead to betray Trump and America by allowing the rigging to go on.

Kloster reveals that there was even an arrest which took place at the local level but still, Barr had issued a standing order to IGNORE all election matters.

Clearly it's not just Democrats that we have to worry about. Even Republicans are rigging elections against TRUE conservatives!
